

**EPOXY SYSTEMS FOR MARBLE & STONE PROCESSING**

You know stone. We know epoxy.

Epoxy systems matched to the way you process stone.

1 Block reinforcement

2 Vacuum
impregnation

3 Slab mesh backing

4 Slab resin treatment

5 Fissure filling

6 Site repair & bonding

CHOOSING AN EPOXY

There isn't always one “right” epoxy for an application.

Working time, penetration, curing speed, build, finish, colour and processing conditions all influence which system works best.

Two processors doing the same job can need different products. So we start with your process, then shortlist systems worth trialling.

WHAT WE LOOK AT WITH YOU

Penetration

How deep the resin goes

Working time

Minutes or hours to work

Curing speed

Turnaround and handling

Build

Film thickness per coat

Gloss & hardness

Finish and polishing

Colour

Whiteness, clarity, yellowing

Heating facility

Room temperature or kiln

Tell us what matters. We'll shortlist what's worth trying.

WHERE MR. JO FITS IN YOUR PROCESS

Block

1 Reinforcement
2 Vacuum
impregnation

Slab

3 Mesh backing
4 Resin treatment
5 Fissure filling

Site

6 Repair & bonding

Our marble & stone processing systems

1 Block reinforcement / wrapping

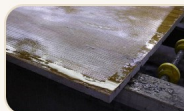

MR. JO MarbleWrap Standard white system

MR. JO MarbleWrap-P Higher whiteness for light stone

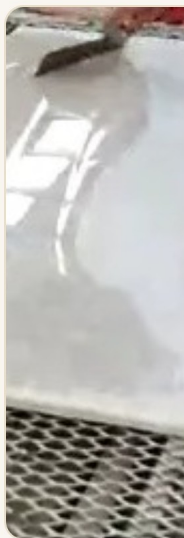

2 Block vacuum impregnation

MR. JO MarbleVaccum Clear, very long working window

3 Slab mesh backing

MR. JO MarbleBack Very fast cure, quick turnaround

4 Slab resin treatment

MR. JO MarbleKot

Quick cure,
room-temperature
processing

MR. JO MarbleKot-GEM

Fast cure, extended working
time

MR. JO MarbleKot-GEM60

Fast, low yellowing,
room-temperature
processing

MR. JO MarbleKot-aGLO

Longest working time

MR. JO MarbleKot-eGLO

Earlier polishing

MR. JO MarbleKot-iGLO

High build, second coat

MR. JO MarbleKot-uGLO

High gloss and hardness

MR. JO MarbleKot-LUX

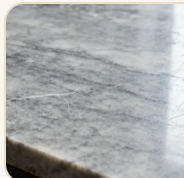

Gloss, faster polishing

5 Fissure / fine crack filling

MR. JO MarbleFill Fast, established system

MR. JO MarbleFill-P Lower yellowing, more working time

6 Site repair / bonding

MR. JO Tecbond-WHT White paste for repair and bonding

MR. JO Bondkot-WHT Natural joint on white marble

MR. JO Bondkot-CLR Clear, fast site repair

CHOOSING THE RIGHT SYSTEM

What are you trying to improve?

YOU NEED...	LOOK AT
More penetration?	MR. JO MarbleKot-aGLO, MR. JO MarbleKot-uGLO, MR. JO MarbleKot-LUX, MR. JO MarbleKot-GEM60
Longer working time?	MR. JO MarbleKot-aGLO, MR. JO MarbleKot-uGLO, MR. JO MarbleKot-iGLO, MR. JO MarbleKot-eGLO
Faster curing?	MR. JO MarbleKot, MR. JO MarbleKot-GEM, MR. JO MarbleKot-GEM60
Earlier polishing?	MR. JO MarbleKot-eGLO, MR. JO MarbleKot-LUX
Higher build?	MR. JO MarbleKot-iGLO
High gloss and hardness?	MR. JO MarbleKot-uGLO, MR. JO MarbleKot-LUX
No heating facility?	MR. JO MarbleKot, MR. JO MarbleKot-GEM, MR. JO MarbleKot-GEM60
White or clear repair?	MR. JO Tecbond-WHT, MR. JO Bondkot-WHT, MR. JO Bondkot-CLR

Let's find the right one for your process.

You don't have to choose from the entire range. Tell us what you want to improve, and we'll shortlist one or two systems worth trying.
